#### Pool Notes

1. All work shall conform to ICC-NJ Residential 2021, International Swimming Pool & Spa Code 2021, National Electric Code 2020, and National Plumbing Code 2018.
2. Piping, fittings and components shall be listed and labeled in accordance with NSF 50 or NSF 14.
3. All piping shall be tested with water, not air.
4. All electrical equipment shall be supplied by branch circuits that have ground-fault circuit interrupter protection.
5. Swimming pool shall be protected with a barrier in accordance with the International Swimming Pool and Spa Code. All gates shall be self-latching. All windows and doors adjacent to the pool shall have an alarm producing and audible warning when the window, screen, or door is opened. The alarm shall be listed and labeled as a water hazard entrance alarm in accordance with UL2017.

#### Installation Notes

1. Pool installation shall be a qualified and licensed pool contractor (approved by local building dept.) and conform to all local building codes. IE: permits, specifications, codes, rules, inspections, workmanship, etc.
2. Backfill materials must not contain rocks or other materials that could damage pool walls.
3. Pool turnover shall be 12 hours. Maximum with hi-rate rapid sand filter (min. 18" dia. or 175 SF) and properly grounded, approved pump (min. 3/4 HP W/29 GPM 60 THD) Hayward or equal.
4. Steps or a ladder shall be provided at the shallow end of the pool.
5. Handrails shall be provided as required by code.
6. Install low voltage light as per NEC 680.
7. Diving platforms or diving boards shall not to be installed on this pool.
8. During a hurricane warning or alert, this pool shall be filled with water.
9. The pool shall meet or exceed the ANSI/NSPI 5 2003 Residential Inground Swimming Pool and ANSI/NSPI 3 1999 permanently installed residential spa standards.
10. Main drain plumbing shall be two drains separated by 3' with approved ANSI/ASME A112.9.8-2001 covers. Alternatively, the approved drains may be placed on different planes. Both drains shall have a common suction line. Suction grates may be used if approved at a maximum of 1 1/2 FFS and the suction piping is recessed from the grate the distance equal to the suction pipe size. In addition, a safety vacuum release system must be installed. This may consist of an air release system. The vent pipes shall be tied to the main drain lines, sized the same as the main drain suction line and brought back to the filter location. Elbowed up and over with a grate for protection and labeled "safety vent". Alternatively, the safety vacuum release system may be an approved valve meeting IAPMO ICC 160-2001. Skimmers do not required protection and may be designed for 3D GPM 1 suction.
11. The following shall be labeled with red label marker tape at the filter location: pipe, valves "safety vent" or "safety device", pump(s) off switch.
12. The following codes are to be met where required: 2021 Standard Swimming Pool Code 2021 International Residential Code - NJ Edition 2020 National Electrical Code and/or any supplement 2006 ANSI/APSP-1 suction entrapment avoidance
13. The following also must be met: Virginia Graeme Baker Pool and Spa Safety Act providing required ASME/ANSI A112.9.8-2001 compliant drain covers.
14. Contractor responsible to determine necessity of pilings based on soil and groundwater conditions prior to construction.
